

DOLL[®]

INTELLIGENT. SAFE. SIMPLE.

The DOLL[®] OCS Operating and Control System

Introducing the New 12" Highlight: Vision X

Exceptionally User-Friendly Service

Our DOLL® OCS system solution features standardized CAN bus technology across all vehicles, ensuring that any issues are quickly diagnosed and resolved to get you back on the road in no time.

Reliably and Protected Electronics

Our pre-programmed electronics are housed in a tough, waterproof switch box, designed for easy access and maximum durability.

Clear Operating Instructions

If an operation isn't completed correctly, our system provides straightforward, step-by-step guidance to quickly resolve the issue – eliminating unnecessary and costly service calls.

Intuitive Display

Key details like vehicle height and platform position are prominently displayed in full color, keeping you informed at a glance.

Comprehensive Maintenance Menu

Built-in diagnostic software alerts you to any malfunctions and guides you through repair and maintenance tasks, empowering your team to handle them independently.

Enhanced Safety Features

To prevent accidental errors, DOLL® OCS is equipped with dual-hand controls, ensuring that each hydraulic function can only be activated one at a time.

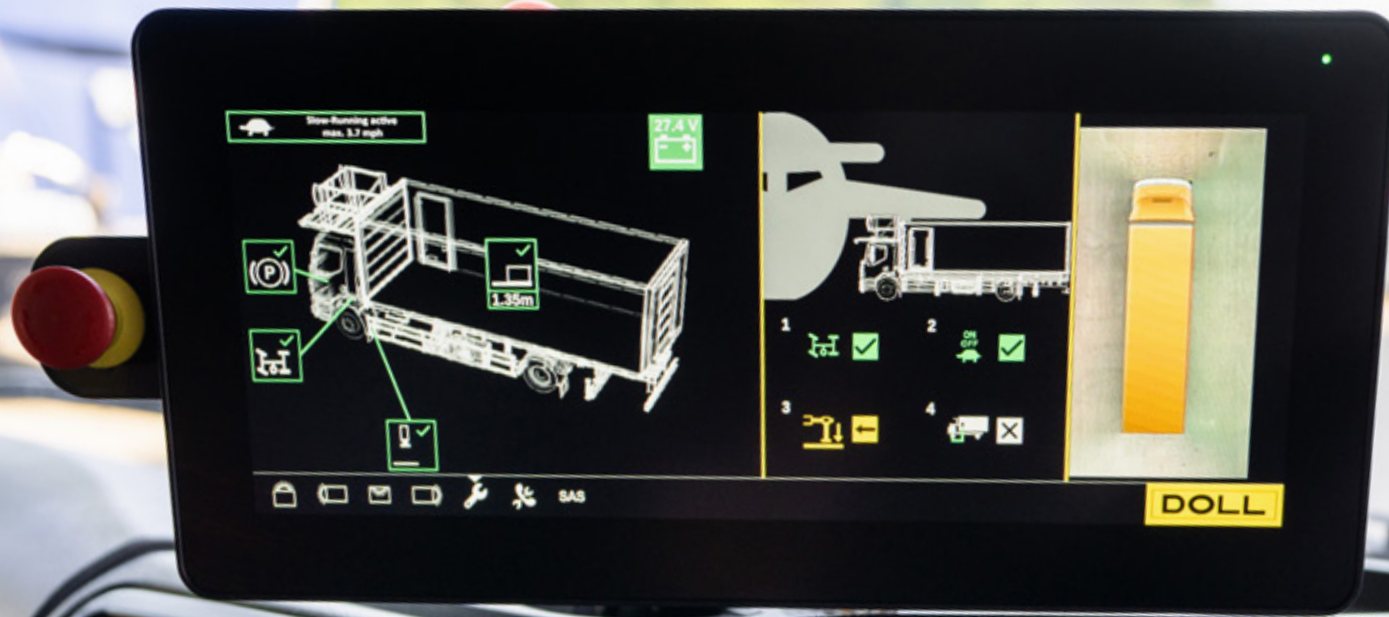

Intelligent. Safe. Simple.

The Pinnacle of User-Friendliness and Driver Support: DOLL® OCS. Discover the innovative DOLL® OCS operating and control system, the ultimate in user-friendly design and driver assistance. Powered by intelligent CAN bus technology, this advanced system allows you to monitor and control your vehicle with ease and confidence.

With brightly colored control lights, your operators gain instant clarity on the status of the scissor lift, box, and platform, ensuring smooth and safe operations. DOLL® OCS simplifies vehicle handling, saving you time while safeguarding your employees from costly operating errors.

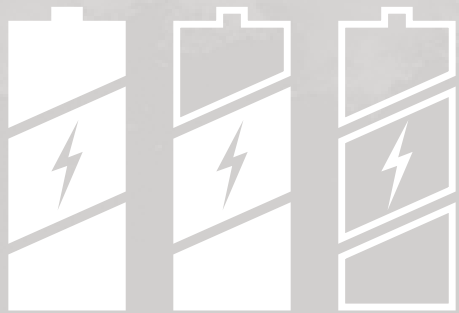

To see what the Vision X screen looks like in action **scan the QR-Code.**

MANAGE. SECURE. OBSERVE.

The New 12" Screen: Vision X

**Choose between the standard 7" screen
or the high-resolution 12" screen**

Stay Powered Up

Our advanced battery management system constantly monitors the performance of each individual battery cell in your zero-emission setup, ensuring optimal balance and controlling cell voltage to prevent over- or undervoltage.

Instant Clarity with Short Videos

Short, clear instructional videos explain all key functions, allowing you to quickly train your staff, minimize errors, and streamline procedures.

Stress-Free Operation

Detailed step-by-step instructions guide you through each function, helping to avoid mistakes and execute tasks efficiently.

Maximum Safety, Maximum Control

Get a comprehensive view with three high-resolution camera feeds on one screen. Enjoy a 3D status overview with critical vehicle information and a 360-degree panoramic view, keeping you fully aware of your surroundings.

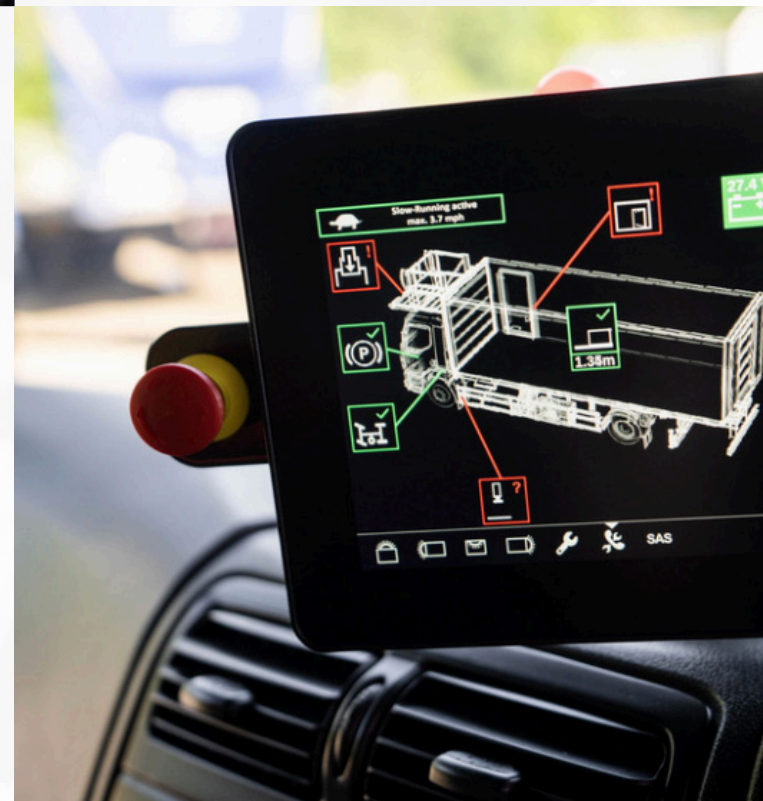

All-Around Awareness

The 360° camera gives you a complete view of all four sides of your vehicle, including a virtual bird's eye view. Quickly and easily spot potential obstacles to ensure smooth operation.

Immediate Assistance When You Need It

If an error occurs, the system alerts your driver with visual warnings and provides clear solution steps, ensuring quick resolution.
